

# SMART INDIA HACKATHON 2025

## EduFlex

- **Problem Statement ID** –25028
- **Problem Statement Title**-Smart Classroom & Timetable Scheduler
- **Theme**-Smart Education
- **PS Category**- Software
- **Team ID**-
- **Team Name (Registered on portal)** - LLMinati

## Project Description: AI Driven Adaptive Smart Timetable Ecosystem

### Proposed Solution

- A web-based intelligent timetable scheduler powered by AI, ML.
- Incorporate AI-powered conflict prediction: the system alerts and proposes proactive fixes for faculty overload, room bottlenecks, and student clashes even before timetables are finalized
- Uses multi-agent system(Faculty Agent, Student Agent, Infrastructure Agent, Admin Agent) for dynamic negotiation and conflict-free scheduling.Adaptive and self-adjusting in real-time to handle leaves, class cancellations, or emergencies.

### Innovation and Uniqueness

- AI-powered conversational assistant for quick scheduling queries and Eco-friendly scheduling(optimized energy and classroom usage).
- Enable student preference integration: the system factors in elective choices, preferred time slots, cross-department enrollments, and special needs accommodations, aligning scheduling to individual learning journeys.

- Technologies used

- Frontend- HTML, CSS, JavaScript (React optional)
- Backend- Python (Flask) / Node.js
- Database- SQLite / MySQL
- APIs- Google Calendar API (optional), Notification APIs
- Tools- IDE VS Code, Git
- Hardware - Standard computer/laptop, Internet-enabled

## Methodology / Process Flow

 Teacher Login

 Dashboard  
(View Schedule, Notifications)

 Manage Classes  
& Resources

 Track Student  
Progress / Analytics

 Generate  
Reports / Alerts

- **Analysis of the feasibility of the Idea**
  - Technically feasible with current web technologies(HTML,CSS,JS,FLASK)
  - Scalable for multiple users with proper database
- **Potential challenges and risks**
  - Data Accuracy -Timetable conflicts or incomplete faculty/classroom data.
  - User Adoption - Teachers may need time to adapt to the system.
- **Strategies for overcoming these challenges**
  - Implement validation checks for input data.
  - Provide a simple and intuitive UI with tutorial/support.

- **Potential Impact on Target Audience**
- Teachers- Reduced workload in timetable preparation, fewer scheduling conflicts, and better workload distribution.
- Students- Access to optimized class schedules, fewer clashes, improved learning experience.
- Administrators- Easier management of faculty and classroom resources, better decision-making support.
- **Benefits of the Solution**
- Social and Environmental- Enhances collaboration between faculty and students, improves overall academic satisfaction. Optimized classroom usage may reduce energy consumption and resource wastage.
- Technological- Encourages adoption of AI-driven tools and digital transformation in educational institutions.
